Hello Paulius,

Based on your answers we will not carry forward with the interview.

You asked to hear about the assessment so here it is:

Dev test.

1. The data structure he chose is not the one we expected.
2. Even the one he chose he made it redundant.
3. He didn't explain why he took this structure and didn't explore other solutions.
4. He didn't show object oriented approach in his code examples.
5. Didn't actually answered some questions, he put just some general phrases.

**Jovan Nikolic**
